ARTHUR BLYTH, Chief Secretary.

Chief Secretary's Office, Adelaide, Aug. 12, 1874.

THE following report from the Chairman of the Destitute Poor Department, for the half-year ended 30th June, 1874, is published for general information.

ARTHUR BLYTH, Chief Secretary.

Destitute Board Offices, Adelaide,
29th July, 1874.

Sir—I have the honor to forward, for the information of His Excellency the Governor, the report of the Destitute Poor Department for the half-year ending June 30, 1874.

The annexed returns indicate a continued, though slight, decrease in the number of persons relieved, under almost every item, with one marked exception, in an increase of nearly sixty adult inmates in the Asylum—the present number being 264 as compared with 205 on January 1st last.

This, however, does not indicate any increase of destitution proper, but has arisen entirely from the numbers of convalescent patients transferred to this institution from the Hospital.

And as many, though discharged from the Hospital, still suffer from chronic complaints, they will probably remain in the Asylum as permanent inmates. It is owing to this that while 150 adult inmates left the Asylum during the last half year of 1873, only 109 could be dismissed during the six months embraced by this report.

By this system the Destitute Asylum is practically made an auxiliary hospital; a large number of its inmates requiring so much medical supervision and care as to render it necessary forthwith to make other arrangements for their accommodation, not only because these convalescents occupy the majority of the beds in each department, but also because there is not the machinery requisite for their proper treatment in the present Asylum.

The Board, therefore, can only renew their former suggestion, made at the close of 1871, that a sanatorium or convalescent hospital should be established for the reception of all chronic and convalescent patients who may be discharged from the Hospital, but who still require frequent medical treatment, in which they may be able to receive the needed medical attention and appliances.

If this is not deemed desirable, and if no action can be taken by the Hospital authorities to diminish the burden thus cast upon this institution, the Board feel that the time has arrived to ask for immediate extended accommodation in both the male and female quarters of the Destitute Asylum.

While, however, calling attention to this special item of increase it is to be noted that it is to be attributed to disease alone. And, apart from the cases which are thus transferred from the Hospital, it may be feared that no diminution is to be expected under this head. With the steady increase in the numbers of the community it may rather be expected that year by year there will be additional numbers who have reached a period in which their strength no longer enables them to provide for their own maintenance; and those whose improvidence or inability have prevented them from providing against this contingency, and who have no children who are bound to maintain them, must seek support from the funds provided by the public.

But it is satisfactory to be able to report that so far as can be learned the Board have not a single pauper under relief who is competent to earn his own living.

The classified tables of our inmates show that (apart from female inmates who rank mainly under the heads of disease

or infirmity) the adults are entirely composed of the aged and diseased; and of the children in the three schools 48 per cent. are sentenced as criminal and neglected children; the remainder, as seen in Table 7, being principally the offspring of vicious and abandoned parents; and of the 1860 relieved outside, 50 per cent. have been driven to seek relief through disease and infirmity, the remainder comprising widows and deserted families.

The number of Asylum inmates able to engage in even light employments is very small. These are employed, when commissions can be obtained, in bag and sackmaking, &c.

Arrangements are also being made for the manufacture of bottle envelopes by such of the inmates as are found competent for the work.

The total sum obtained as reimbursements during the past half-year from relatives, &c., liable for maintenance, and paid into the Treasury, was £103 Os. 8d.; and also the sum realized through the labor of the Asylum inmates in sack-making, &c., £16 Os. 9d.

Magill School.—While death has removed many of the aged Asylum inmates during the last six months, at the Magill School, notwithstanding the general prevalence of epidemics during so many months, the children have been free from illness of any kind.

While a larger number of children have been placed out for adoption without payment than at any former period reported upon, the admissions have increased in an equal ratio, principally by committals, viz., 64 as against 47 in the previous six months; and these have still further increased since the date embraced by this report, nine having been admitted within the last three weeks.

The educational progress is quite as satisfactory as can be expected from the tender ages of the children now at the school.

The dairy department in this institution has yielded a credit during the last six months of £70 11s. 7d., including the sale of four cows for £33.

Since the last report the Board have continued to receive through the different visitors, apart from the official inspections of the Chairman, ample confirmation of the success of the boarding-out system, both with respect to the comfort of the children and the kindly treatment and affection of the foster parents.

It may be noted, however, that the Board have been enabled to discontinue the practice of subsidizing, except in special cases, from having found upon inquiry so many persons who are willing to adopt children without payment.

Strict inquiries are made into the circumstances of each child, and Table No. 8 shows that with respect to 299 children at present placed out, 545 reports have been received during the past six months—one child only remaining unreported on, under circumstances in which reports should, according to regulations, have reached the Board; the abscondings and unsatisfactory reports being, it is considered, very few in proportion to the total number under supervision.

In any general measure of this nature, however, it must be expected that some failures should occur, though happily these have been very few in comparison with the number of children placed. All that the Board can do is to guard against abuse by careful investigation into character before a child is placed out, and by periodical investigation after-

wards (through their Chairman and through the visitors of the Boarding-out Society) and also by a prompt inquiry into any complaints which may reach them and an immediate removal of the child in cases where the complaints appear to be well founded. And the Board take this opportunity of inviting information from all persons who may have reason to suspect any neglect or ill-treatment of any child, assuring those who may furnish that information that it shall receive prompt and careful attention.

But so far as the working is already known it is a great success and a great boon to the children themselves, in raising them out of a position of neglect and isolation to that of members of a family, and loved and treated as such by their foster parents. And it may be hoped that this system will have a far more extended bearing than on the immediate happiness of the children themselves. The three hundred already so advantageously settled should cause an eventually notable reduction not only in the pauperism of the Colony but also in the amount of crime which, under other circumstances, might have been expected to prevail.

Accounts have been opened at the Savings Bank for 36 children placed out at service since the date of the Act, and £62 14s. 3d. has been deposited during the last six months for wages received from their employers.

Boys' Reformatory.—The boys at the Ilfracombe Reformatory, with some exceptions, have rewarded the care and attention that has been bestowed upon them. I believe, as a whole, they are well trained and efficiently educated for the positions they are designed to fill. Four have absconded, two of whom were arrested and returned to the school, and two have remained undiscovered until last week, when one also of these was apprehended and brought back. They have done good service in the industrial branches—the shoe-making department yielding a net profit of £62 18s. 7d. and the dairy account of £11 1s. 3d. Ten pounds has also been paid into the Treasury as the profit of their bottle-envelope making.

In view of the expiration of the lease of the Ilfracombe premises in December next, the Board have urged upon the Government very strongly the desirableness of establishing a floating reformatory or hulk as the best and most economical mode of treating these boys, whether as regards safe guardianship or effective training.

The Board have therefore suggested the purchase of a hulk of from 200 to 300 tons for this purpose, and trust that their recommendation will be adopted by the Government.

Girls' Reformatory.—The Girls' Reformatory is proving a good training school for servants, and the Board are increasingly satisfied with the genial, kindly influence and training that is brought to bear upon the inmates by the excellent matron and her assistants, as shown in the general improvement and altered conditions and bearing of the children while under these better auspices. They regret, however, that the effect of these beneficial influences is too often destroyed by re-contact with former influences and companions at the expiration of their sentence.

There can be but little hope that any improvement which may be caused in their reformation can be permanent unless the girls are sent there for a sufficient time to allow of the formation of better habits; and it is therefore of great importance that they should be committed to the Reformatory for the longest period allowed by the law, viz., until sixteen years of age.

The Board would again acknowledge the kind interest which is manifested by the Committee of the Visiting Society, as well as by many ladies and gentlemen in visiting and in ministrations to the inmates both of the Destitute Asylum and the Schools; as also the kindness of those gentlemen and ladies who have gratuitously provided entertainments for the enjoyment of the inmates. The thanks of the Board are equally due to those gentlemen in various corporate towns and country districts who have devoted much time gratuitously to the management of local destitute matters.

I have, &c.,

T. S. REED, Chairman.

JOHN F. CLELAND,
Registrar-General of Births, Deaths, &c.

Chief Secretary's Office, Adelaide, August 3, 1874.

HIS Excellency the Governor directs the publication of the following petition, for general information.

By command,

ARTHUR BLYTH, Chief Secretary.

Second publication.]

To His Excellency ANTHONY MUSGRAVE, Esquire, C.M.G., Governor and Commander-in-Chief of the Province of South Australia and the Dependencies thereof, &c., &c.

The petition of the undersigned ratepayers of the District of Mount Gambier West:

Humbly sheweth—

That a petition of the owners and occupiers of land in the Hundreds of Blanche, Gambier, MacDonnell, and Caroline has been presented to your Excellency (*vide Government Gazette* of July 16th, 1874), praying for the severance of a portion of the south-eastern corner of the Hundred of Blanche from the District of Mount Gambier West, and that the said land be annexed to the District of Mount Gambier East; and in defining the boundaries thereof the said petitioners propose including a most valuable portion of the District of Mount Gambier West.

That should the prayer of the said petitioners be granted the District of Mount Gambier West will lose a considerable sum per annum in rates, and will still have to maintain the roads by which alone the said petitioners have access to the Township of Mount Gambier and other parts of the District of Mount Gambier West.

That your petitioners have no objection to the severance of a portion of the District of Mount Gambier West, so as to allow the said petitioners access to the main road, provided the boundaries are the same as agreed to when a deputation from the said petitioners attended a meeting of the District Council of Mount Gambier West, held on the 30th April, 1874, which are as follows, viz.:—Commencing at the south-east corner of Section 545, Hundred Blanche, and running thence west, along the southern boundaries of Sections 545, 548, to the road dividing Sections 604 and 602; thence south, along the road dividing Sections 602 and 604, 462 and 463, 600 and 608; thence south-westerly, along the road dividing Sections 606, 605, 475, 474, to the south-west corner of Section 474; thence east, along the southern boundary of the Hundred of Blanche, to the south-west corner of the Hundred of Gambier; thence north, along the western

boundary of the Hundred of Gambier, to the starting point, as shown on the plan forwarded herewith and colored red.

Your petitions therefore humbly pray that the desire of the ratepayers as to the boundaries of the portion proposed to be severed from the District of Mount Gambier West be granted as herein described.
